Breck's Lawn Grass Seed

Lawn on the Estate of Henry G. Lapham, Esq., Brookline, Mass.

JOSEPH BRECK & SONS, BOSTON, MASS.

Dear Sirs: The lawns on this Estate were originally laid down with Breck's Lawn Grass Mixtures and we have used them exclusively ever since. The results attained have given us the utmost satisfaction. *Very truly yours*

(Signed) R. BARKHOUSE, Superintendent for Henry G. Lapham, Esq.

Brookline, Mass., July 20, 1923

We have given much thought and made many experiments in order to ascertain just what are the best mixtures for permanent lawns, and the grasses which are best suited to this climate. By the proper blending of the varieties which constitute Breck's Lawn Grass, we have obtained mixtures that from early Spring to late Autumn will give to lawns made with them that rich, deep green so often admired upon the lawns and parks of England, but so seldom seen in this country.

BRECK'S "BOSTON PARK" LAWN GRASS SEED

The finest lawn grass mixture ever offered to the public. It costs more, it is worth more.

Per bushel, 32 pounds..... 14.00

Two bushels will sow one acre.

BRECK'S "BANK AND TERRACE" GRASS MIXTURE

A mixture of deep-rooting grasses especially prepared for embankments and situations where it is impractical to get a successful catch of the less-spreading-rooted sorts. It produces a rich velvety turf throughout the season. No coarse-growing varieties are used in this mixture.

BRECK'S PRIZE MEDAL DAHLIAS

The following list is composed of the most up-to-date, popular, and satisfactory varieties both for Exhibition purposes and for the amateur as well. We would advise placing orders early. As our stock of tubers becomes exhausted we shall fill orders with strong, well-rooted plants from 2½-inch pots.

MRS. CALVIN COOLIDGE

A New Paeony Flowered Dahlia

Best described as a delicate orchid colour, this new Paeony-flowered Dahlia is unquestionably headed for the Show Tables of 1924 and a place of honour among the most distinguished varieties of recent introduction. The flowers are not too large, of good depth, well formed, and with the outer petals beautifully curled and ruffled. Unlike some varieties it is ideal for garden decoration as well as for show competition, being of vigorous growth and producing a profusion of bloom on good strong stems. *This variety was personally selected at our Grower's Trial Grounds by Mrs. Calvin Coolidge and was thereupon named after her. It is a flower indeed worthy of "The First Lady of the Land."*

BRECK'S DAHLIAS

These old-fashioned flowers have always been in favour on account of their bright colours, and their freedom of bloom under unfavourable conditions. Their extreme variation in form and colour has resulted in an almost endless assortment of named Dahlias; but careful selection reduces to a comparatively small number the sorts that are of recognized value for garden cultivation, and it is of such sorts that our collection is comprised. Type of flower is indicated after name of each.

BRECK'S GLADIOLI

None of the Summer-flowering bulbous plants have the great popularity enjoyed by Gladioli. They are everybody's flowers because everybody can grow them. Their adaptability to garden decoration or to use as cut-flowers during the Summer and early Autumn is surpassed by no other flower we know of. In cutting Gladioli it is best to cut the spikes as soon as the first flower has opened, always leaving from four to five leaves when cutting. The remainder of the blossoms will open in the house and last much longer. The simplicity of its culture is one of the most important qualifications of this splendid flower.

In presenting to you the following Gladioli, we wish to state that our catalogue has been entirely revised by one who has been associated with and has grown Gladioli for the past twenty years. The entire selection is based on bulbs which have proved their merit. You will not be disappointed in any one of them. They are selected as having vigorous spikes with many flowers open at one time, but more especially for their value in clearness of colour. Considerable care has also been exercised in selecting those bulbs which have a great deal of vigour. The following descriptions of Gladioli have been made as concise as possible.

CULTURAL DIRECTIONS: Any good garden soil will grow Gladioli provided they are planted in a sunny location. Bulbs should be planted six inches deep and from four to six inches apart. We recommend an application of Sheep Manure or a mixture of ground bone and wood ashes when extra good blooms for Exhibition purposes are desired. Otherwise, no extra or special attention is at all necessary. Bulbs may be planted as early as the ground is dried out in the Spring, and planting may continue until the middle of July with good results. In the Autumn when the leaves begin to turn brown, or after the first two or three pronounced frosts, the bulbs should be lifted, the stalks cut off and they should be stored in a cool, dry place.

Bulbs at the single or dozen prices sent post-paid. Not less than six sold at the dozen rate.

The following list of Primulinus-Gladioli is strongly recommended by us as being of superior merit. The colours are clear and pure. The plants are erect in habit and have many large flowers open at one time. They also have the exceptional value of being good keepers after being cut. The colours of Primulinus-Gladioli tend to yellows, oranges, and tints of pink, rose, etc. They are without a doubt the finest vase flowers.
